

NFT minting on
Mantle

THE POWER OF SIMPLICITY

Current problems with NFT minting platforms

Complexity of NFT Creation

Users who just want to mint NFTs can find current minting platforms to be unnecessary complex. They often ask users for emails or other informations irrelevant for the minting process.

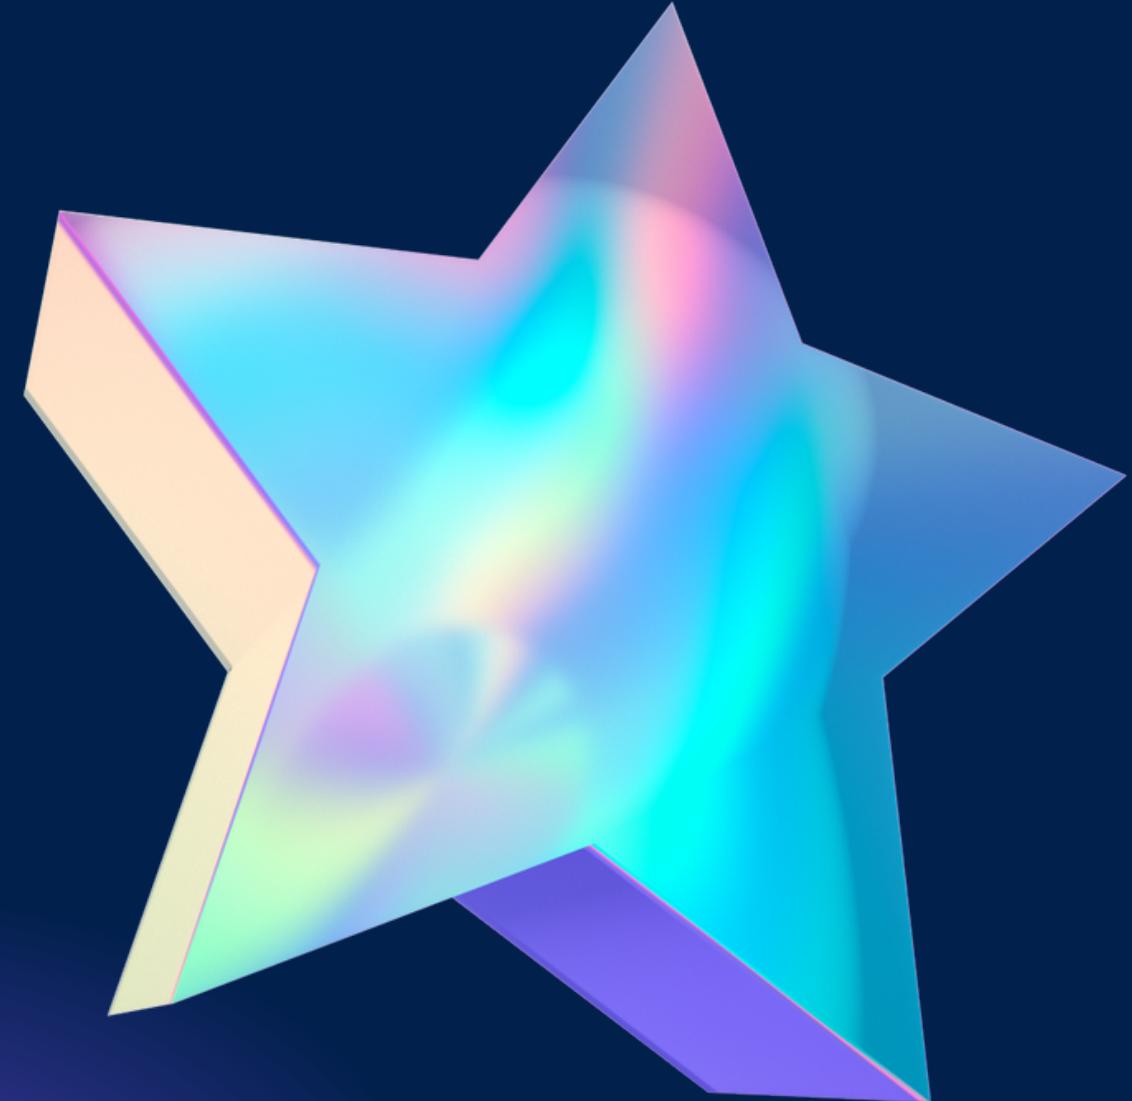

High Gas Fees

The cost associated with minting NFTs on the mainnet can be **prohibitively expensive**, limiting access to artists with smaller budgets.

Focus on selling

Prioritizing immediate profit generation through the sale of NFTs, often overlooking the **intrinsic value of digital ownership**.

Our solution

SprintMint

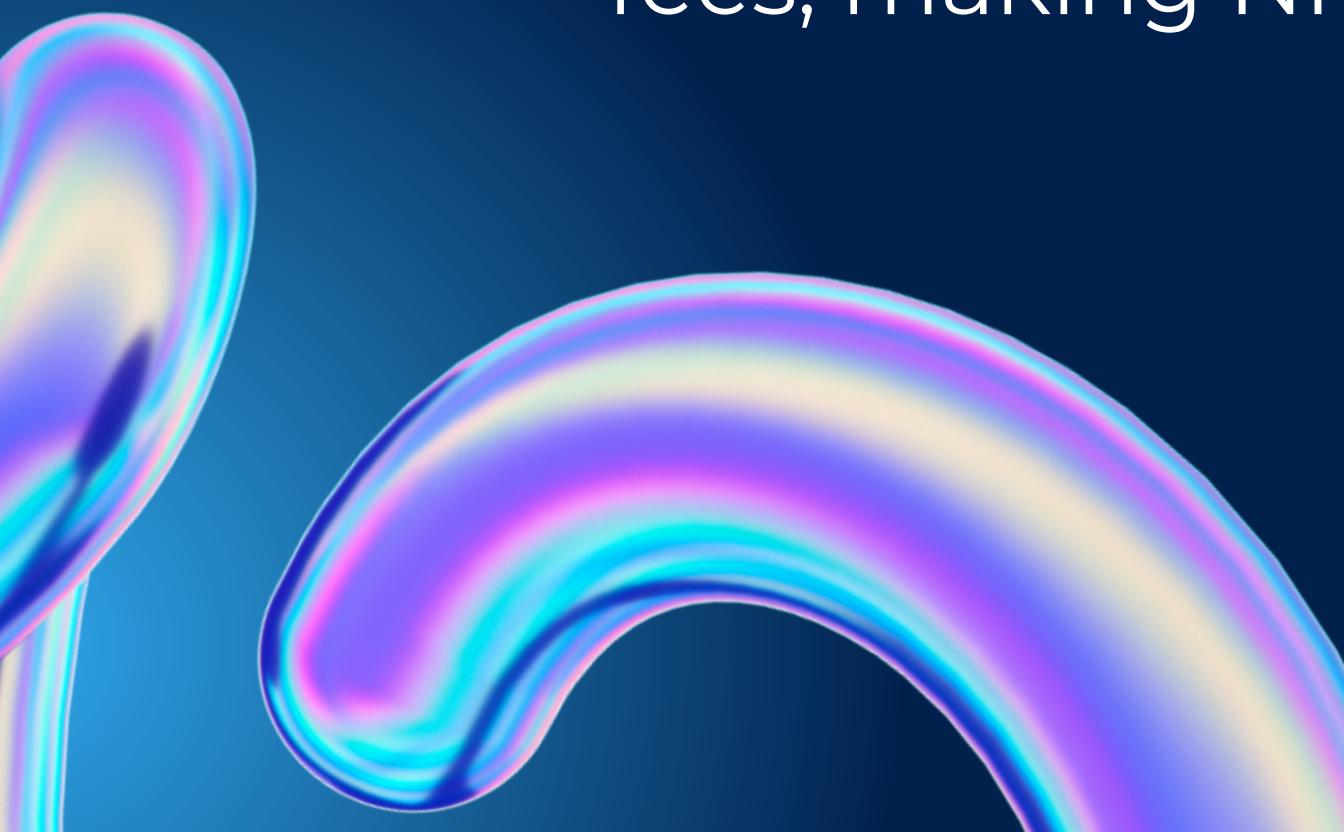

Simplified Minting Process

Our product provides an intuitive and user-friendly platform that simplifies the entire NFT creation and minting process.

Cost-Effective Testnet

By operating on the Mantle testnet, we eliminate high gas fees, making NFT creation accessible to a wider range of users.

Focus on creating and owning

We created SprintMint with clear goal in mind: to prioritize creating and owning over selling. Thanks to minimalistic design, who just wanna mint an NFT, can now do it quicker and easier than ever.

Use cases

SAVING MEMORIES

Creating NFT as digital memorabilia of important events

EXPLORATION AND LEARNING

Accessible entry point for users that are new in NFT space

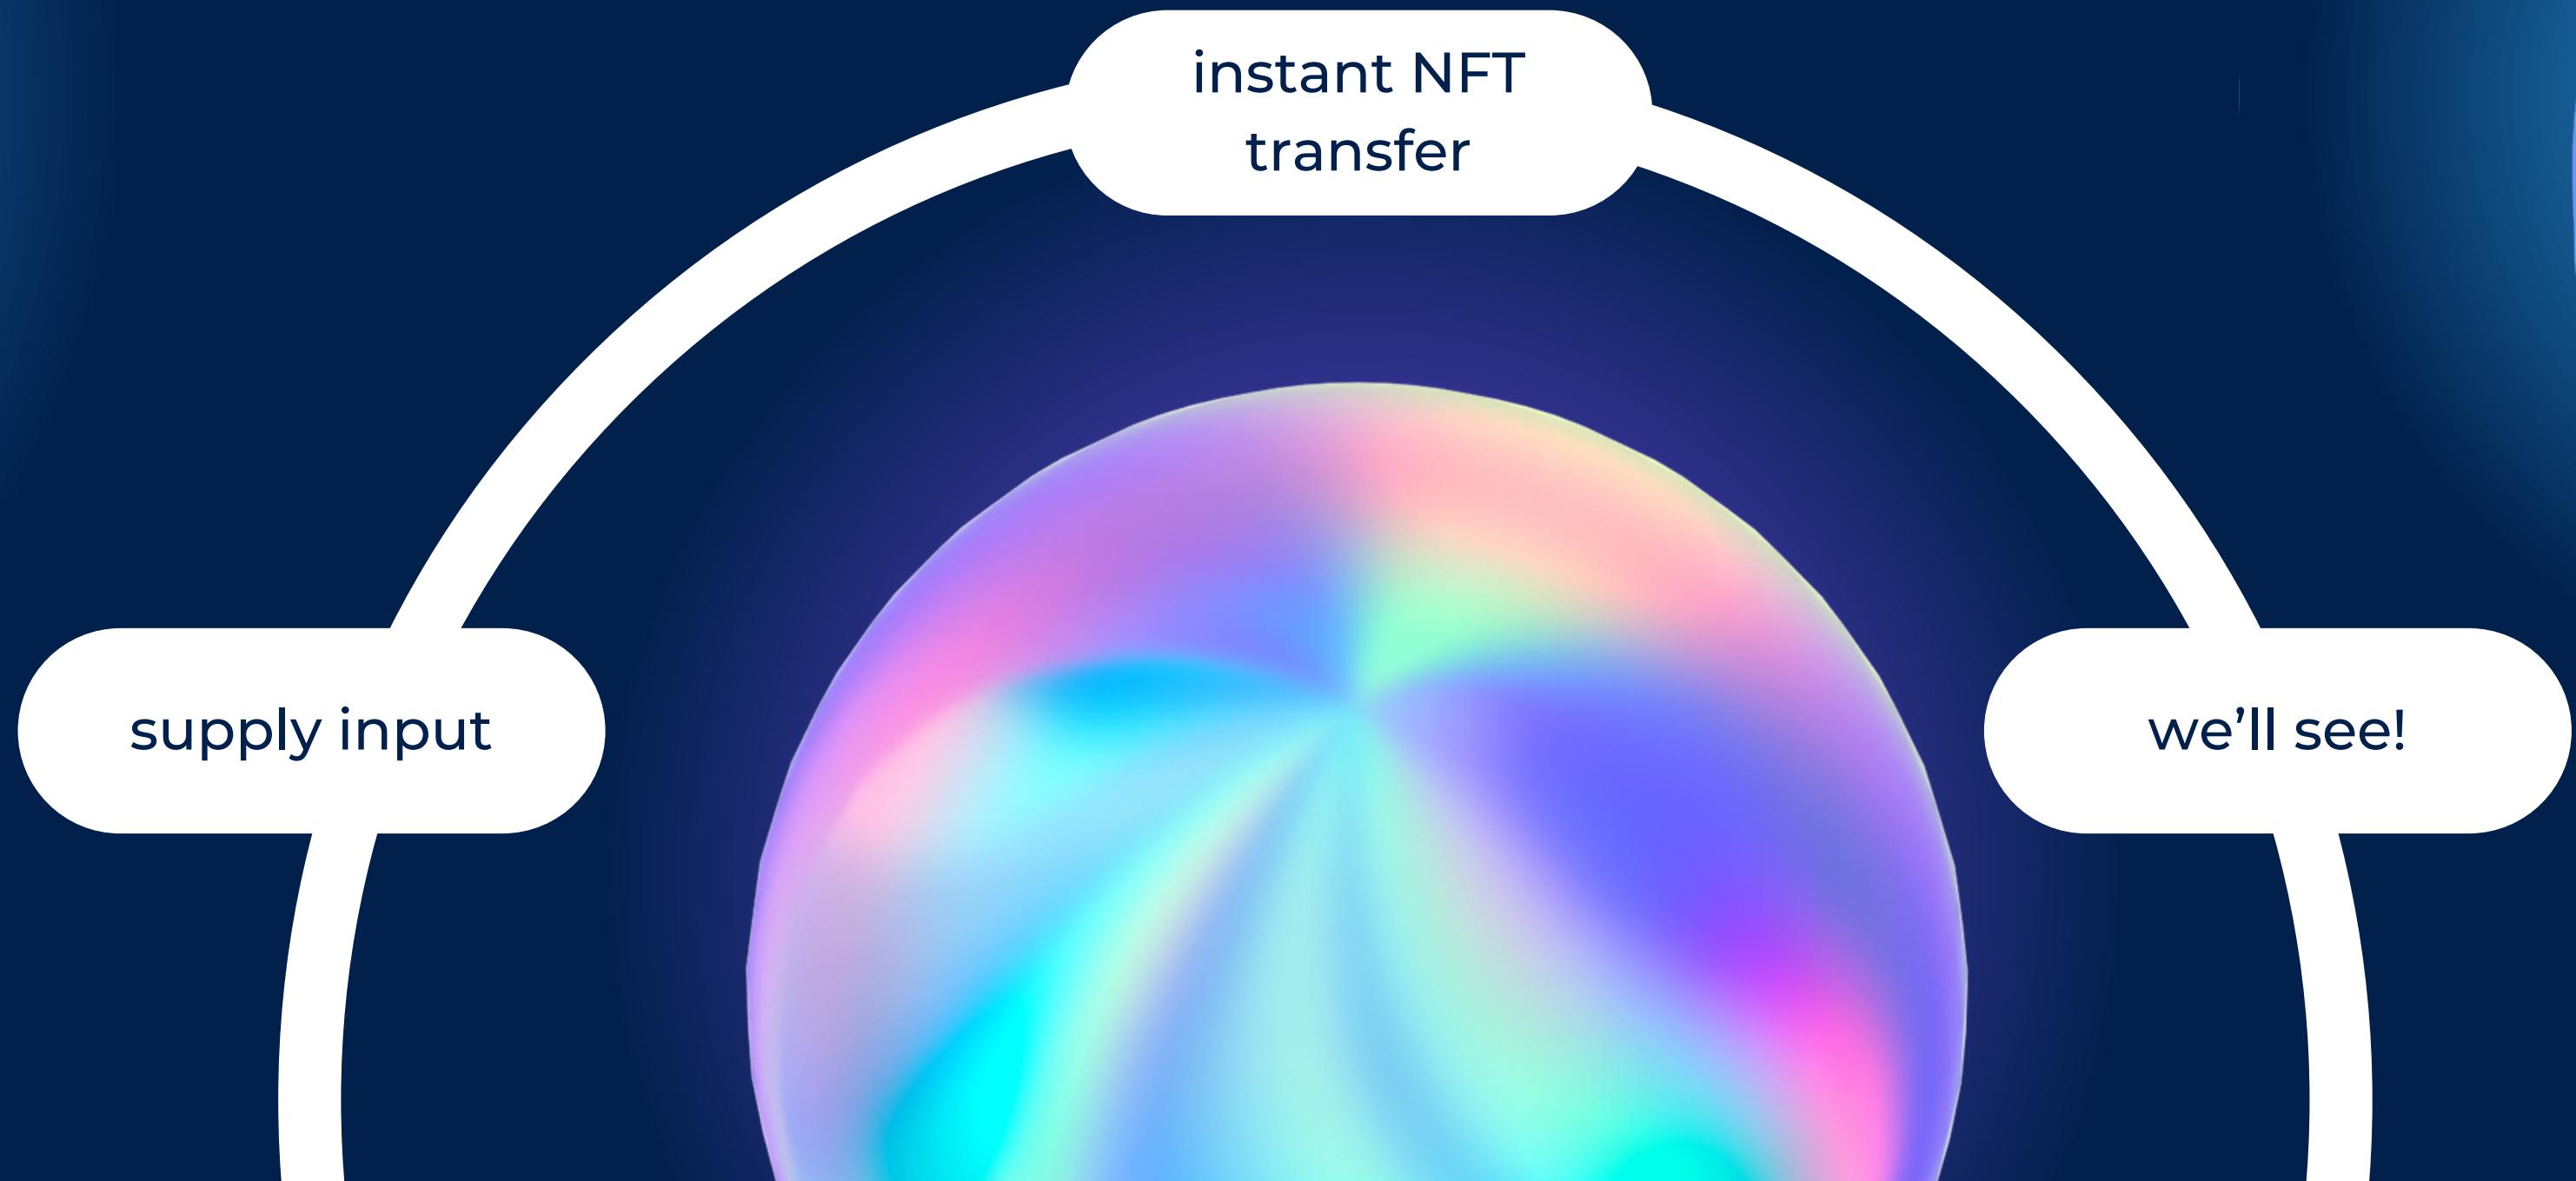

QUICK PROOF

Establishing a timestamp and provenance for digital content, which can be valuable in legal or professional contexts

TO GIVE, NOT SELL

Minting NFTs that hold sentimental value as unique digital gifts for others

Future directions

Thank you!
